## INTRODUCTION

Following is a list of publications of the Montana Department of Natural Resources and Conservation. Publications are listed in three sections: general publications, environmental impact statements, and water resources surveys.

The list includes publications released since 1971, the county-by-county water resources surveys, which were published over a period of thirty years prior to that date, and several titles issued in the late 1960s and early 1970s as part of a water inventory series. Many may be obtained by writing to the Department; others may be read in our offices, photocopied, or borrowed. Others, including out-of-print documents, are available through public and university libraries in Montana, interlibrary loans (at public libraries everywhere), the Documents Distribution Center at Montana State Library, or through specialized services such as the National Technical Information Service.

To order publications, ask for them by title and year of publication. You can use the order form at the back of the booklet. Address your request to:

Montana Department of Natural Resources  
and Conservation  
1520 East Sixth Avenue  
Helena, MT 59620

Be sure to include your name and address when ordering.

The department does not charge for most of its publications. Among the exceptions are the Montana water resources surveys, some of which are available at \$5.00 each from Water Rights field offices indicated on the last page of this publication. If you order a publication with a charge, please note on your check that it's for a publication, and make the check payable to the Montana Department of Natural Resources and Conservation.
